

Digital Tools on the Farm

Julie DiNatale

Digital at Corteva Agriscience™

Software to Use On Farms

SaaS (Software-as-a-Service) for farmers, branded Granular

Sales Enablement

Software to make Corteva **channel** more efficient and effective and bring more value to farmers

New Business Models

Software to make Corteva **products** more effective and unlock potential for farmers

Value to Farmers

Operational, financial and agronomic data in one place

DATA MANAGEMENT

Online collaboration between farm and trusted partners

COLLABORATION

Improve profitability with data-driven decisions

DECISION MAKING

How We Help Farms with Digital...

Innovative Software Products

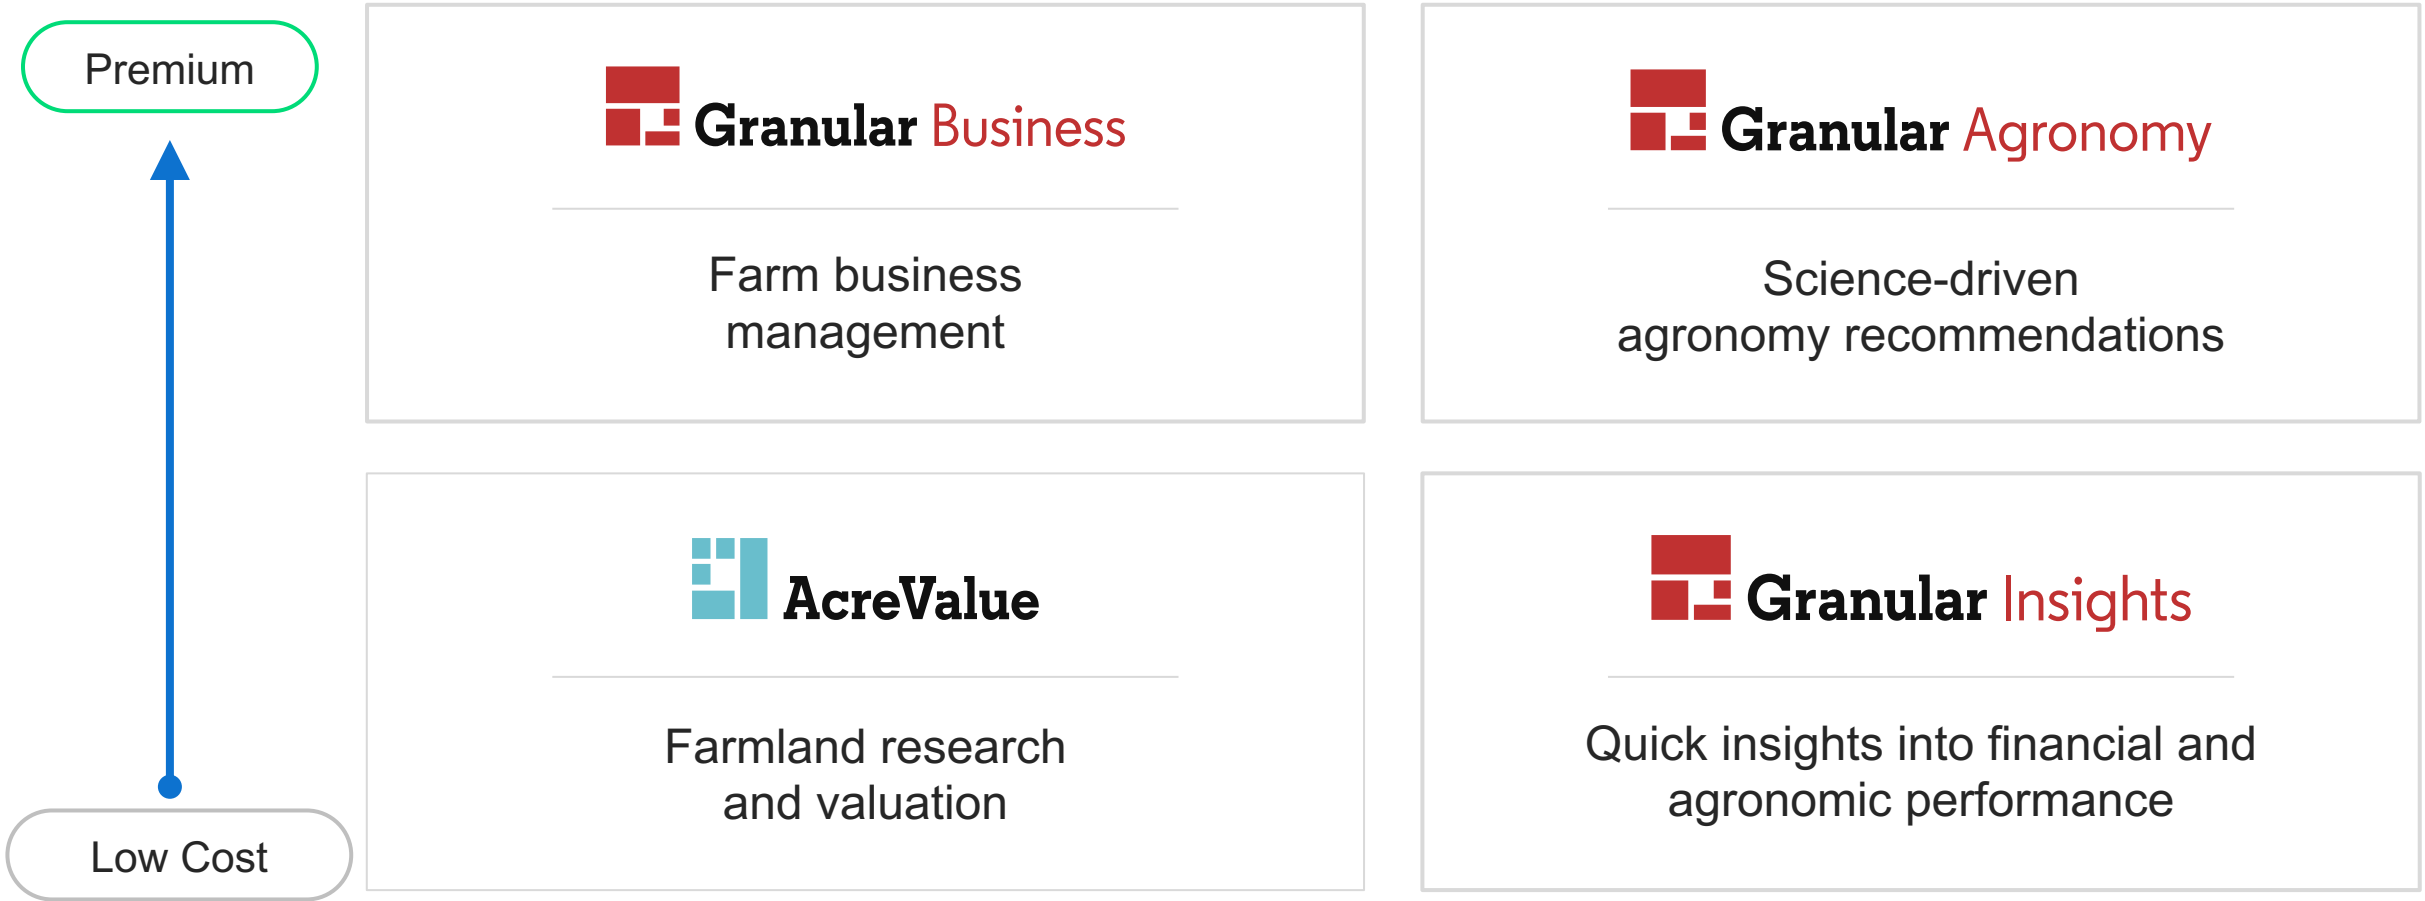

- Covering whole farm business
- Powerful but simple to use
- Connected to Corteva Agriscience™ & industry partners

Leveraging Corteva Scale

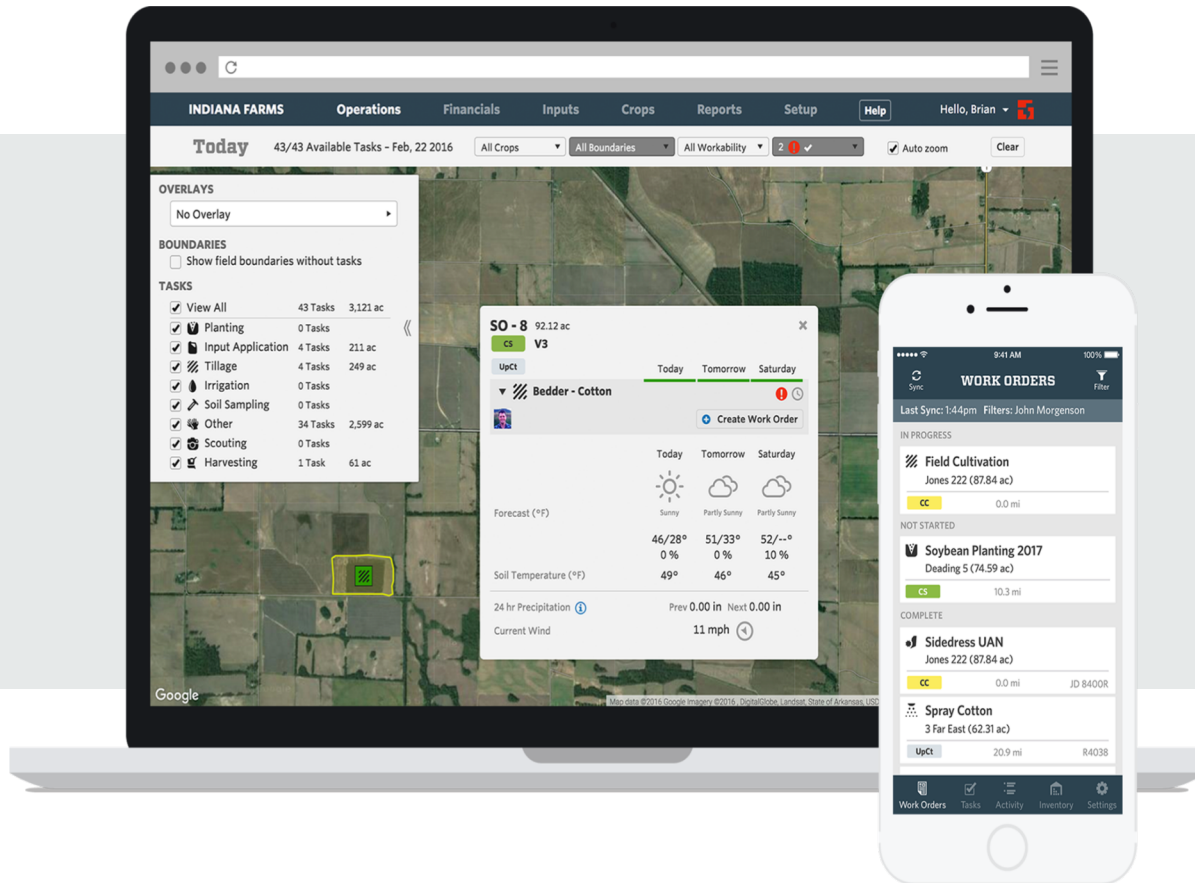

- Global cross-sell with seed and crop protection
- Science-driven models with R&D

Covering Whole Farm Business

Powerful but Simple to Use

- Easy from mobile, tablet & web
- Role based collaboration tools
- Automated data import
- Decision support not decision making

Granular Product Strategy

KEEP GROWING

Go Beyond Intuition

Agronomic and financial data in **one place**

- Easily calculate **ROI of agronomic decisions** like varieties, seeding rates, harvest moisture, and more
- Get **real-time performance** across the entire operation and down to the sub-field level

Identify **at-risk** fields faster

- Know which fields are at-risk with **Scout Priority^{beta}** field rankings sent every Monday
- Spot crop trends sooner with **high frequency** satellite imagery
- Scout exactly where you need with the GPS-enabled **Find Me** feature

KEEP GROWING

KEEP GROWING

Granular Agronomy

Premium Agronomy Tools

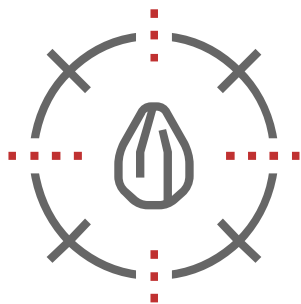

- Variable Rate Seeding
- Fertility Rx (P, K, pH, Micros)
- Nitrogen Rx

Best-in-class service

- CSAs are still primary delivery plan method, with a new comp plan
- Professional services now available to CSAs and Seed reps

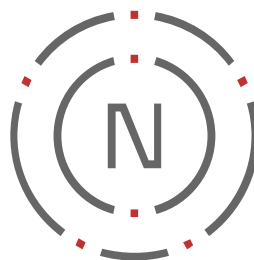

Tackle Variability with Confidence

Know that you are applying your inputs precisely to maximize your soil's productivity with the peace of mind that your crop will have everything it needs to hit your yield targets.

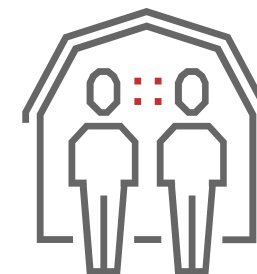

Fertility + Seeding

Get more done
with less

Nitrogen

Maximize yield with
data-driven crop models

Local Custom Support
